ADVANCE CARE PLANNING WHEN TO REVIEW YOUR DOCUMENT

We encourage you to review your documents often for:

- **Health Care Agent - Is their contact information correct?**
- **Are your wishes the same?**
- **Is the document at your doctor/hospital?**

It is recommended that you review and update especially when any of the following “five Ds” occurs:

- **Death** of a family member or friend
- **Divorce** or **Marriage**
- **Diagnosis** – after any new medical diagnosis
- **Decline in health**
- **Date** – review at least every 5 years

BCHIP offers a **FREE** program to help you review and, if needed, update your existing advance care planning documents, create new documents, and—with your permission—share copies with your healthcare providers and family members.

If you have questions or wish to schedule an appointment, please contact Bucks County Health Improvement (BCHIP) 267-291-7882.
